Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 1- 5, drawn to a method of manufacturing a stamper and a stamper for manufacturing an information medium, classified in class 101, subclass 483.

II. Claim 6-8, drawn to an information medium, classified in class 369, subclass 272.

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the invention of Group II which includes a negative pattern for storing information has different modes of operation, different functions, or different effects from the structure of the stamper, the photoresist master or the manufacturing of the photoresist master of Group I.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 2854

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
